Error Distribution & Calibration

Where the model lands and which bands of the target it handles best

Accuracy is strongest in the 30,991–38,590 band (6.4% median error) and weakest in 500–4,400 (44.8%).

Feature Importance

Top 10 attributes the model relies on when estimating price
The top 3 features (year, odometer, type) explain 70% of the model's decisions.
